

Partnering Up to Save Lives!

Imagine a child's life hanging in the balance because of a heart condition they were born with. Now imagine that happening over 1.3 million times a year. A staggering 93% of these children lack access to the life-saving treatment they need.

Gift of Life International is a lifeline. They provide a child with life-saving heart surgery every 99 minutes. Thousands of children are given a second chance at life every day.

Partner with the Rotary Club of Davidson and participate in the solution! We're raising funds for our 2025-2026 mission to the Dominican Republic, where we'll bring Gift of Life's expertise to children in desperate need. Your contribution will directly support surgeries, medical supplies, and travel expenses for our volunteer medical team.
